

NEW HAMPSHIRE

RATINGS/CRITERIA:

Candidates were evaluated on their acceptance of climate change as a real, human-caused problem, their willingness to engage in dialogue about climate action, their voting record on climate-related legislation (if available), their willingness to engage with POW AF, the extent to which climate is a priority in their campaign, leadership displayed on climate issues in general, fossil fuel industry campaign donor records, and whether or not they have championed climate legislation.

Any candidate polling publicly above 10% was evaluated.

CANDIDATES FOR THE US HOUSE OF REPRESENTATIVES:

District 1:

STEFANY SHAHEEN: Double Black Diamond

Shaheen is committed to action on climate change alongside lowering New Hampshire's high utility costs. She wants to expand the state's solar, wind, hydropower, and biofuel industries and modernize the grid to cut costs.

ANTHONY DILORENZO: Out of Bounds

DiLorenzo aligns closely with Trump's energy dominance agenda, emphasizing fossil fuel production over alternatives and fails to address climate change or GHG emissions.

District 2:

MAGGIE GOODLANDER: Black Diamond

Goodlander consistently votes for climate legislation and acknowledges it as a pressing issue. She backs all energy sources, including hydropower and nuclear, and criticized Trump's rollback of clean energy incentives in the OBBBA

LILY TANG WILLIAMS: Out of Bounds

Williams hasn't acknowledged climate change publicly, advocates for energy from all sources, including oil and coal, and opposes both EV growth and carbon taxes.

CANDIDATES FOR THE US SENATE:

CHRIS PAPPAS: Double Black Diamond

Pappas calls climate change an existential threat and helped pass the Inflation Reduction Act and the Great American Outdoors Act. He's pushed to reinstate federal clean energy grants the Trump administration tried to cut in New Hampshire. He consistently fights for GHG emissions reductions, public lands, and clean energy.

JOHN SUNUNU: Green Circle

Sununu rarely voted for environmental protection and generally opposed emissions-reduction efforts, though he did co-sponsor a bill targeting power-plant emissions. He supports offshore drilling, oil shale extraction, mining, and logging on federal lands.
